

Rate LGA's effectiveness on WATER SAFETY - (e.g., support of boating safety, operations, buoy maintenance)

County	FullTime/Part Time	Rating	Comments
Brunswick	Part Time	Good	I feel the new surfing boats wakes are damaging to the shoreline.
Brunswick	Full Time	Fair	LGA water safety could be more involved with Lake Gaston Safety Council -- doing basically same thing
Northampton	Part Time	Good	Jimmies Cove is up for allowing "NO Wake sign up on either side of the back island before someone gets killed by a jet ski or pro skiers whipping around it and "slapping the dock" !!!! as a game.
Northampton	Part Time	Poor	Try enforcing low wake levels on the lake when water levels are up !
Northampton	Part Time	Good	Seems that some of the buoys have moved over the winter and out of position. I think # 5 is missing. Notifications need to be put out when buoys are missing or far out of position.
Northampton	Full Time	Fair	There are many missing bouys this year.
Halifax	Part Time	Unsure	There seems to be a buoy (MM 6, I believe) that has washed up onto someones shoreline. I sent a message to who I believed/read was the appropriate POC, but havent noticed a response.
Warren	Full Time	Good	Do people realize a boat in NC can get as close as they want to a dock? Do people know Surf & wake boats can come into any cove no matter the size and produce 3-4' waves with no safety regard for swimmers, shorelines, or boats moored? There are no navigation lights on the Eaton Ferry Bridge.

Warren	Full Time	Fair	did not agree with the bulletin last year about increasing laws against increasing shoreline distance and music, etc. You just asking people to complain. Most people state they want a no wake buoy for safety but the real reason is for damage to boats/shoreline b/c the boat is not properly moored or hte shoreline is not protected by rocks The laws that are already on the books just need to be followed and enforced.
Warren	Full Time	Good	Be more proactive in monitoring location of buoys
Warren	Part Time	Unsure	Many boaters violate the "No Wake Rules" on Lizard Creek. (Less than 50 feet from my boat house with swimmers in the water and at high speed towing people.) Where is law enforcement?
Warren	Full Time	Poor	Water Safety is a joke. No requirements on people coming to the lake from out of state. People need a boat drivers licence. No controls on people creating huge waves in coves and driving reckless.
Warren	Part Time	Unsure	There seems to be a buoy (MM 6, I believe) that has washed up onto someones shoreline. I sent a message to who I believed/read was the appropriate POC, but havent noticed a response.
Warren	Full Time	Fair	Buoy postions and lighting needs improvement
Warren	Full Time	Poor	first memorail day on lake since buying home and there are way too many people operating boats close to each other at or near full operating speed and in close quarters to each other
Warren	Full Time	Unsure	Would love to see more done when it comes to wakeboard boats come close to our docks. Seems they should have the same rules of 100 feet from docks just like the pwc.

Warren	Full Time	Good	A suggestion would be to push for restrictions on boating activities when LGA is advised of flood control operations--both with fisherman, & boaters pulling wake Boarders creating waves to damage Docks, boats, rip/rap or sea walls, etc.
Warren	Part Time	Excellent	Excellent coordination with LGWSC.
