

Rate LGA's effectiveness on ENVIRONMENT / WATERSHED PROTECTION - (e.g., monitor water quality, lake levels, insect control, use of chemicals, protect lake's shoreline, fish and wildlife)

County	Full Time/Part Time	Rating	Comments
Northampton	Full Time	Good	didnt know there was "insect control". Out of the 20yrs. we have lived on the lake our cove has only been sprayed for hydrilla twice, we have paid \$175 each year, with some people not getting service. Also when carp are entered into the lake only one year did we have any in our cove, the rest were all above Jimmys Creek. Being at the end of the lake, near the dam it seems we are forgotten.
Northampton	Part Time	Good	Doing a good job.
Warren	Full Time	Excellent	Fall Survey & water quality management is excellent
Northampton	Part Time	Poor	How do you protect the shore line? Do you fight to make owners reforest their property to "Protect" the shore line or water quality, no. But you will protest someone wanting to clear their lot. This is the "I have mine and I dont want you to change it" mind set.
Warren	Part Time	Excellent	I recall more focus on water quality and lake levels than other items mentioned.
Warren	Full Time	Good	It would be reassuring if Dominion were to publish photographs of lake shoreline damage along with the penalties paid and required corrective action to be taken by named offenders. Perhaps there are no legal teeth in the Reservoirs provisions. If there are, then public notice of legal action taken would deter (or awaken) other property owners.
Halifax	Part Time	Poor	Lake levels
Warren	Full Time	Good	Lake levels as we all know have become a problem

Rate LGA's effectiveness on ENVIRONMENT / WATERSHED PROTECTION - (e.g., monitor water quality, lake levels, insect control, use of chemicals, protect lake's shoreline, fish and wildlife)

County	Full Time/Part Time	Rating	Comments
Warren	Full Time	Fair	Lake levels have fluctuated a great deal in the past year or two, much moreso than in previous years
Warren	Full Time	Good	Need more pressure on Dominion to keep high water levels to a minimum.
Northampton	Part Time	Prefer Not to Answer	Need to Discuss this as our community has some problems in this area
Northampton	Full Time	Unsure	not informed
Warren	Part Time	Excellent	Please keep after the dreaded hydrilla!
Northampton	Part Time	Good	To briefly touch on one of the questions below, shoreline erosion is not as bad as ive seen in other lakes in the NC but we there are isolated areas.
Warren	Part Time	Poor	Water Levels
Northampton	Full Time	Poor	We have owned the same property for 30+ years. The first half of that time the lake levels managed to were a foot lower than what it is managed to now. HOW COME ? Where were the LGA when the increased levels were authorized ? And, WHY were they authorized ?
	Full Time	Good	While we realize its primarily out of your control; lake levels are too high for too long. When you get into June, you are talking about debris affecting all boaters. So much damage being done to bulkheads, docks, beaches,(ours is basically gone), and shoreline.
	Part Time	Good	Would like more publications of results of hydrilla protection that affect my area.
